

For more information, please visit anthem.com.

- If you have additional questions about your prescription benefits please call the Member Services number on your ID card
- Speech and hearing impaired (TDD/TTY users) should call 800-221-6915, Monday – Friday, 8:30 a.m. – 5:00 p.m., ET
- For the most current version of this prescription drug list, please visit anthem.com
- Bring a copy of this drug list/formulary to your next doctor's visit to assist in selecting the lowest cost medications

KEY

Tier 1 – Lowest copayment – Drugs offering the greatest value within a therapeutic class. Some of these are generic equivalents of brand name drugs.

Tier 2 – Medium copayment – Drugs on this tier are generally the more affordable brand-name drugs. Other drugs are on this tier because they are “preferred” within their therapeutic classes, based on clinical effectiveness and value.

Tier 3 – Highest copayment – These are higher cost brand-name drugs. Some Tier 3 drugs may have generics or equivalents in Tier 1. In addition, some drugs on this tier may have been evaluated to be less cost-effective than equivalent drugs on lower tiers.

QUESTIONS AND ANSWERS

Q. What is a Drug List/Formulary?

A. The Anthem Drug List/Formulary is a list of FDA-approved brand-name and generic medications that have been reviewed and recommended for their quality and effectiveness by the National Pharmacy and Therapeutics (P&T) Committee. The P&T Committee is an independent group of practicing doctors and pharmacists responsible for the research and decisions surrounding our drug list. This group meets regularly to review new and existing drugs and choose the top medications for our drug list—based on their safety, effectiveness and value.

Drugs on the Anthem Drug List/Formulary are grouped by ‘tiers.’ A number of factors are considered when classifying drugs into tiers, including, but not limited to: the absolute cost of the drug; the cost of the drug relative to other drugs in the same therapeutic class; the availability of over-the-counter alternatives; and other clinical and cost-effectiveness factors.

Because the medications on the drug list/formulary are subject to periodic review, please ask your physician about the most current drug list additions and deletions or visit anthem.com.

Brand-name: A brand-name drug is usually available from only one manufacturer and may have patent protection.

Generic: A generic drug is required by the FDA to have the same active ingredients as its brand-name counterpart, but is normally only available after the patent protection expires on a brand-name drug. Although it may look different, a generic drug works the same as its brand-name counterpart. You can save money by using generic medications.

Q. What if my physician or I choose a brand-name drug when a generic equivalent is available?

A. In most cases, you would be responsible for the appropriate tier copay. This copay may include an additional charge that represents the cost difference between the brand-name medication and the generic equivalent.

Q. What are ‘clinically equivalent’ medications? How does this affect my drug coverage?

A. The P&T Committee reviews the most current research available to determine if multiple drugs used to treat a disease/condition produce the same clinical effect. When this is the case, the committee may recommend that we cover only the lower cost drug(s) as part of our effort to help reduce the overall cost of care. This means your specific prescription plan may not cover some drugs in classes with ‘clinically equivalent’ alternatives.

Q. What if my medication is not on the drug list/formulary?

A. An open drug list allows members and their physicians to choose from a wide variety of prescription medications. Please talk with your doctor about prescribing a Tier 1 or Tier 2 medication. If a Tier 3 medication is selected, you will be responsible for the applicable Tier 3 copayment.

You or your physician may submit a request to add a drug to the drug list/formulary either in writing or on our web site. Requests are taken into consideration by the P&T Committee during the drug list/formulary review process.

Inclusion of a medication on the drug list/formulary is not a guarantee of coverage. Some drugs, such as those used for cosmetic purposes, may be excluded from your benefits. Please refer to your Certificate or Evidence of Coverage for coverage limitations and exclusions.

Tier 1

Acarbose	Atenolol/chlorthalidone	Cefaclor ER	Dexamethylphenidate	Ethinyl estradiol/ ethynodiol diacetate PA	Guaifenesin
Acebutolol	Atropine sulfate	Cefadroxil	Dextroamphetamine	Ethosuximide	Guaifenesin SR

KEY

^ This product has clinically equivalent alternatives included on the formulary and, as a consequence, such product may not be covered under your pharmacy benefit. Please consult your on-line pharmacy account through your health plan website, anthem.com, for details on coverage.

PA = PRIOR AUTHORIZATION REQUIRED. Prior authorization is the process of obtaining approval of benefits before certain prescriptions may be filled.

QL = QUANTITY LIMITS. Certain prescription drugs have specific quantity limits per prescription or per month.

ST = STEP THERAPY REQUIRED. You may need to use one medication before benefits for the use of another medication can be authorized. Please note: Foradil and Serevent are safety edits that prevent duplication of therapy.

DO = DOSE OPTIMIZATION REQUIRED. Normally involves the conversion from twice-daily dosing to a once-daily dosing schedule.

Not all medications and not all plans are subject to prior authorization and quantity limits. For more information regarding prior authorization or quantity limits, contact Member Services at the telephone number listed on your identification card.
